Subject: Chuitna Mine GWVistas files

Hello Matt,

I am working with NARF and Heather Kendall-Miller on reviewing documents related to the proposed Chuitna Mining project. We spoke briefly several weeks ago. I am looking for the GW Vistas files used for model calibration and predictive simulations (Groundwater Vistas is an industry-standard software package used in groundwater modeling.) Heather Kendall-Miller suggested that you might have these. Do you have the model input files?

I apologize if someone with NARF has already contacted you about this. I thought it would be quicker to just go directly to you.

Thanks.

Joel Massmann
